

## **Respiratory Therapy Section**

*Respiratory therapy* is both a clinical and scientific discipline. We provide a full range of respiratory care services 24 hours 7 days a week. Our range of service includes, but not limited to, daily and as needed assessment and evaluation of respiratory status of critical patients, delivery of all types of oxygen therapy and its systems including high flow, non-invasive mechanical ventilation, conventional and non-conventional invasive mechanical ventilation, airway management, arterial blood gas sampling analysis and reporting, deep tracheal aspiration, internal hospital transport for critically ill patients, nebulization for mechanically ventilated patients.

*Respiratory therapy section* is fully equipped with the most advanced machines (including ventilators, BIPAP, ABGS machine, high flow therapy system...) and quantity of supplies that can cover a large number of patients.

The mission of Respiratory Therapy at the SQCCCRC is to provide the highest quality of respiratory care services to our patients. We make all efforts to promote continues quality improvement activities to improve the performance of the section as well as the overall performance of the organization.

The Respiratory Therapy section functions under the leadership of the head of ICU & HDU.

Located in the 5th floor in ICU.
